Charger

Installation

Insert iPad®
(iPad sold separately)

Plug in Cable

1. Set bottom of iPad at angle and insert right corner. Then press the left bottom corner into place. Carefully work the upper right corner of iPad into the case followed by the upper left.

2. Insert USB-C cable from VersaEye into the USB-C port of the iPad.

3. Start your iPad.

OPEN

ⓘ About   Hiru   ↓ Update Hiru   ✕ Close

Settings   Calibration   Help

If yellow Update Hiru button appears:

1. Set Auto-Lock to Never in Settings>Display & Brightness during updates.

2. Return to Hiru app and proceed with update.
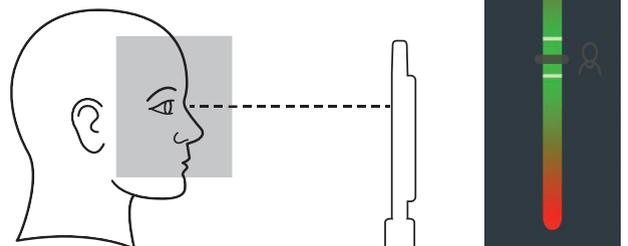

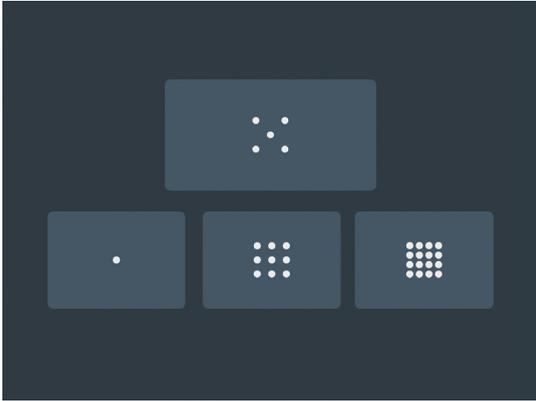

3. Restart iPad and VersaEye module.

Positioning

Align your eyes with the upper 1/3 of the iPad screen.

Sit approximately 22" from the device.

Calibration

The number of Calibration Points determines the number of stimulus points you will look at during calibration. The more points you follow accurately, the more accurate control the user will gain over more of the screen.
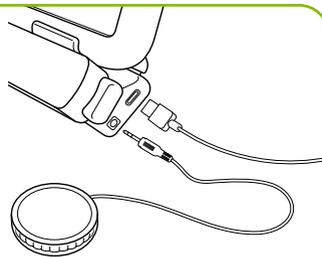

Adjust Smoothing

+ Smoothing changes the sensitivity of the cursor.
+ Lower values will be more sensitive to eye and head movements.
+ Higher values will be less sensitive to eye and head movements.

Use a Switch to Select

1. Plug in your switch or connect it via Bluetooth®.
2. Move the cursor to the target using your eyes.
3. Activate the switch to Tap, Double Tap, or Hold and Drag.

VersaEye is compatible with a 3.5 mm wired or Bluetooth wireless switch for making selections.

Use Dwell Control to Select

1. Go to: Settings > Accessibility > Touch > AssistiveTouch.
2. Turn on Dwell Control.
3. Movement Tolerance: Adjust the distance the cursor can move while dwelling on an item.
4. Adjust Dwell Time.
